

## What's FLUSHABLE?

A toddler will tell you that *everything* is flushable... but what you *think* is flushable could be costing you money!

Product labels can be misleading. Some items that claim to be "flushable" can clog sewer and septic systems and can end up costing you a pretty penny.

**"Flushable" does NOT mean it is SAFE for your septic system or sewer.**

"Disposable" items ARE NOT flushable and should be placed in the trash.

The bottom line:

**ONLY**  
Human waste and toilet paper  
**ARE FLUSHABLE**

## The DO NOT FLUSH List:

Diapers  
Cigarettes  
Paper Towels  
Cotton Swab  
Tampons

Condoms  
Dental Floss  
Facial Tissues  
Wipes

## The Hidden Cost

A recent survey shows that towns have spent an average of **\$40,500** dealing with unflushable items in sewer systems.

The replacement cost of a typical residential leach field is **\$6,000-15,000**
