

**Get your Free
Smoke Alarm!**

Home Fire Preparedness Campaign

Did you know that if a fire starts
in your home, you may have just two
minutes to escape?

- 7 times a day, someone dies in a home fire
- Every 40 minutes, a fire injury is reported
- Home fires cause, on average, 2,500 deaths and roughly \$7 billion in property damages every year.

The most effective way to protect yourself and your home from fire is to identify and remove fire hazards. 60 percent of house fire deaths occur in homes with no working smoke alarms. During a home fire, working smoke alarms and a fire escape plan that has been practiced regularly can save lives.
