Councilor Paul asked if there was a timeline on when the rest of the information will come in. Councilor Paul stated that if too much time passes, the data wouldn’t be good. Mailloux stated that some of the recommendations are to continue to receive and update data, so to just items having to do with the results. Mailloux stated the high energy, low cost items are going to be the ones that they’re going to work on first. Councilor Paul asked if anyone has reached out to the residents and finding out if anyone has had their water tested, would they be willing to give the town a copy of their test to help map out what is what. Mailloux stated that it is a task on the list. It could be a low cost to the town. It’s not something that has started yet.

Vice Chairman Green asked when some of the costs would be filled in. Mailloux stated
that the timing on getting this to the Council, they missed this budget cycle. Mailloux stated that departments are working on identifying the task steps and the dollar amount associated with each. The goal is to come back to the Council during CIP or the beginning of the budget season next year.
